

Volker Haug

Volker Haug's designs strike the perfect balance between raw minimalism and the unexpected. His work uses simple, clean lines, but combines this slick aesthetic with punchy colours and kooky shapes. Volker's designs are completely unlike anything else on the market... classy yet full of personality.

Volker Haug was ten years old when he created his first light on holidays in a shed in the Czech Republic. It was a series made of wood, (completely flammable!) which incorporated 2 bed side lights, 4 kitchen spots and a ceiling light.

Volker remains passionate about lighting and lighting design and now designs lights for contemporary spaces utilizing raw materials. His unique industrial, minimalist style and limitless creativity can transform any space.

STATEMENT

Whenever I design something I think/dream about it night and day, I'm almost obsessed, nothing can stop me. I've always been like that, drove my dad crazy as a kid.

I love educating people about the potential lighting can have on our lives.
